## Introduction

The SingleCare **Program Formulary** contains covered drugs for a broad range of diseases and is organized into drug classes (e.g., penicillin). Generic drugs are shown in lower-case. Brand prescription drugs are shown in capital letters.

### Pharmacy Benefits

To save the most money on prescription drugs, take this drug list with you each time you visit your physician. Consider asking your physician to prescribe generic (Tier 1) and preferred (Tier 2) formulary medications, if appropriate. Decisions about the need for a prescription drug and dosage of a prescription drug must be made solely by you and your physician, in accordance with your patient/physician relationship.

The SingleCare **Program Formulary** is multi-tiered, placing prescription medication into copayment levels. Members should refer to his or her Summary of Benefits and Coverage documents to see which copayment structure applies to them. For plans with a 4-tier benefit structure, medications indicated in this guide as “Specialty” will fall under this tier.

### Coverage Considerations

Most prescription drug benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some plans may exclude coverage for certain agents or drug categories, like those used for erectile dysfunction, weight loss or infertility.

**Over-the-counter exclusions:** The **Program Formulary** may not provide coverage for prescription medications that have an over-the-counter version. You should refer to your benefit plan material for details about your particular benefits.

**Compounded medications:** Your benefit plan may not provide coverage for compounded medications. Please see your plan materials or call the number on the back of your ID card to determine whether compounded medications are covered and/or verify your payment amount.

**Repackaged medications:** Repackaged versions of medications already available on the market are not covered.

### ACA Benefit

Preventative medications are covered as part of the Affordable Care Act (ACA) and are available at no member cost share with a valid prescription. These medications are determined by guidance from the U.S. Preventive Services Task Force (USPSTF), Health Resources and Services Administration (HRSA) and Advisory Committee on Immunization Practices (ACIP). Medications in this guide are indicated with a noted “ACA benefit” in the Restrictions column and may also indicate other criteria to meet this designation.

### Non-Covered Drugs

Certain drugs are non-covered on the SingleCare **Program Formulary**. If you fill a prescription for a non-covered drug, you will likely pay full retail price. Please talk to your physician about prescribing a preferred alternative. Non-covered medications are not listed in this formulary guide.

## Notice

The purpose of the SingleCare **Program Formulary** is to provide a guide to coverage. Decisions about the need for a prescription drug and dosage of a prescription drug must be made solely by you and your physician in accordance with the patient/physician relationship.
